

ABSTRACT

A spray gun allowing paint in atomized state to be jetted from a paint jetting
5 part (3) provided in a body frame (5) by the operation of an operating member (6),
wherein an air jetting means (4A, 4B) for forming a covering air flow surrounding the
periphery of atomized paint jetted from the paint jetting part (3) are formed in the
thick-walled part or internal space of the body frame (5), whereby the covering air
flow can be formed by the air jetting means (4A, 4B) in connection with the
10 operation of the operating member (6).
